

## iOS Application Developer

### Job Description

---

Ashcom Technologies Inc. is a premier developer of business system software and related mobile and Web technology solutions servicing a variety of industries. Ashcom is currently seeking an iOS Application Developer to join its growing, fast-paced company. This position has a specific emphasis in system analysis, design, database and programming support for business applications, working independently from the offices in Ann Arbor, Michigan.

### Duties

---

- Design, development, implementation, and maintenance of a series of programs, a subsystem, revision or enhancement of a current system written in iOS with Microsoft SQL Server database.
- Perform technical design and implementation of complex iOS applications.
- Review client requirements, wireframes, and designs for technical feasibility, then work with the development team to translate these into user stories that can be implemented.
- Improve product quality through code reviews, writing effective unit tests, and collaborating with QA to implement automation testing where appropriate
- Communicate effectively with clients and senior management.

We hire on a 90-day independent contract, with possible conversion to full-time employment following the 90 day evaluation period.

### Qualifications

---

- BS/MS degree in Computer Science or equivalent experience
- 5 or more years of experience in mobile software development for iOS.
- Demonstrated experience developing iOS applications in a professional setting
- Passionate about mobile development and writing correct, and efficient code
- Strong understanding of Swift and the Cocoa frameworks
- Strong proficiency with iOS using Swift, Xcode, (Objective-C and ReactNative are a plus)
- Strong proficiency with mobile development utilizing MS SQL Web Services.
- Ability to develop and maintain an Application Program Interface (API) for mobile applications is a plus.
- Motivated to perform and willing to work hours necessary to meet agreed upon deadlines
- Solid grasp of iOS networking and REST Web Services
- Understanding of iOS development tools and the development life cycle
- Familiarity with iOS provisioning, and App Store deployment
- Familiarity with agile development methods (Scrum/Kanban)
- Excellent verbal and written communication skills
- Cross-platform development for iOS and Android applications are a plus
