

## VB.NET Application Developer

### Job Description

Ashcom Technologies Inc. is a premier developer of business system software and related mobile and Web technology solutions servicing a variety of industries. Ashcom is currently seeking a VB.NET Application Developer to join our growing, fast-paced company.

This position has specific emphasis on system analysis, design, database and programming support for business applications. This role would be based out of our Ann Arbor, Michigan offices.

### Qualifications

- 5 or more years experience in software development for the web
- Must have experience in a team environment and the ability to fulfill many different roles based upon the needs of a particular project
- Strong proficiency with VB.NET, ASP.NET, HTML, XML, JavaScript, Crystal Reports and MS SQL Server 2005, 2008, 2012 (stored procedures and database manipulations), TFS, Visual Studio 2005 - 2010, and Installshield (or similar programmatic install utilities)
- Strong proficiency with relational database design and object oriented development (SQL Server)
- Motivated to perform and willing to work hours necessary to meet agreed upon deadlines

### Duties

- Design, development, implementation and maintenance of a series of programs, a subsystem, revision, or enhancement of a current system written in VB.NET with Microsoft SQL Server database
- Recommends approaches to users and team for solving business problems, defines system requirements and functional specifications, designs, codes, develops test plans, tests, documents systems and advises users on system uses
- Collaborate on program specifications or list of functional requirements for a system change
- With minimal assistance, codes programs, develops test scripts, reviews test results
- Writes documentation or prepares help screens for users, operations, and future program maintenance
- Develop and maintain SQL stored procedures
- Be able to manipulate various data formats and import/export to or from SQL proficiently
- Proficient in creating and integrating Crystal Reports into VB.NET applications
- Works with other departments to ensure web development meets the customers' expectations
